

AWS Official References – Storage Services

MZ-UCA Cloud Academy

Facilitator: Mthulisi Zulu | Cloud Governance Architect

Students are encouraged to read the official AWS documentation alongside these notes.

Amazon S3 (Simple Storage Service)

Recommended Student Lab Exercises

Lab 1 – Amazon S3

- Create an S3 bucket
- Upload files
- Enable versioning
- Configure lifecycle rules

Reference:

[Amazon S3 Getting Started Guide](#)

Lab 2 – Amazon EBS

- Launch an EC2 instance
- Create an EBS volume
- Attach the volume
- Create a snapshot

Reference:

[Amazon EBS User Guide](#)

Lab 3 – Amazon EFS

- Create an EFS file system
- Mount EFS on multiple EC2 instances
- Demonstrate shared storage

Reference:

[Amazon EFS Getting Started Guide](#)

MZ-UCA Student Challenge

After completing this module, every student should be able to answer:

1. When should I use S3 instead of EBS?
2. Why is EFS considered shared storage?
3. Which storage class is best for archives?
4. What service connects on-premises storage to AWS?
5. How does AWS Backup improve governance and compliance?

Expected Answer Framework:

- S3 = Object Storage
- EBS = Block Storage
- EFS = File Storage
- Storage Gateway = Hybrid Storage
- AWS Backup = Centralized Backup Governance

MZ-UCA Motto:

"Learn the Service. Understand the Architecture. Master the Governance."
