
◆ AWS CLOUD PRACTITIONER BOOTCAMP

WEEK 1 — SESSION 1 REVISION PACK

CLOUD FOUNDATIONS & CORE SERVICES

◆ SECTION 1 — CLOUD FUNDAMENTALS

◆ Question 1

Which statement BEST describes cloud computing?

- A. Buying physical servers for long-term use
 - B. Accessing IT resources over the internet on demand
 - C. Hosting applications only in local data centers
 - D. Using hardware without internet connectivity
-

◆ Question 2

Which of the following is a BENEFIT of cloud computing?

- A. High upfront cost
 - B. Limited scalability
 - C. Pay-as-you-go pricing
 - D. Manual hardware management
-

◆ Question 3 (Trap-Based)

A company wants to avoid managing physical servers. What should they choose?

- A. On-premise infrastructure
- B. Cloud computing
- C. Local hosting
- D. Dedicated hardware

◆ SECTION 2 — CLOUD vs ON-PREMISE

◆ Question 4

Which characteristic is associated with ON-PREMISE infrastructure?

- A. Instant scalability
- B. Pay-as-you-go
- C. Hardware ownership
- D. Global access

◆ Question 5

Which is TRUE about cloud environments?

- A. Customers manage AWS data centers
- B. Resources can scale dynamically
- C. Hardware must be purchased upfront
- D. No internet access is required

◆ SECTION 3 — CAPEX vs OPEX

◆ Question 6

Which pricing model does AWS primarily use?

- A. CapEx
- B. OpEx
- C. Fixed pricing
- D. One-time payment

◆ Question 7

Which is an example of CapEx?

- A. Paying monthly for cloud services
 - B. Purchasing servers upfront
 - C. Paying only for usage
 - D. Scaling automatically
-

◆ Question 8 (Exam Trap)

Why do companies prefer OpEx?

- A. It increases hardware ownership
 - B. It eliminates scalability
 - C. It provides cost flexibility
 - D. It requires upfront investment
-

◆ SECTION 4 — SHARED RESPONSIBILITY MODEL

◆ Question 9

Who is responsible for securing data in AWS?

- A. AWS only
 - B. Customer only
 - C. Both AWS and customer
 - D. Data centers
-

◆ Question 10

Which of the following is AWS responsible for?

- A. User permissions
 - B. Application data
 - C. Physical infrastructure
 - D. Password policies
-

◆ Question 11 (Trap-Based)

Which task is the CUSTOMER responsible for?

- A. Managing data centers
 - B. Securing IAM users
 - C. Maintaining hardware
 - D. Power supply
-

◆ SECTION 5 — GLOBAL INFRASTRUCTURE

◆ Question 12

What is an AWS Region?

- A. A single data center
 - B. A geographic area with AWS resources
 - C. A storage service
 - D. A security feature
-

◆ Question 13

What is the purpose of Availability Zones?

- A. Reduce storage cost
 - B. Improve fault tolerance
 - C. Replace regions
 - D. Control access
-

◆ Question 14 (Exam Insight)

High availability is achieved by:

- A. Using one server
 - B. Using one AZ
 - C. Using multiple AZs
 - D. Using one region only
-

◆ SECTION 6 — CORE SERVICES

◆ Question 15

Which service provides virtual servers?

- A. Amazon S3
 - B. AWS IAM
 - C. Amazon EC2
 - D. AWS CloudTrail
-

◆ Question 16

Which service is used for object storage?

- A. Amazon EC2
 - B. AWS IAM
 - C. Amazon S3
 - D. AWS Lambda
-

◆ Question 17

Which service manages access and permissions?

- A. Amazon S3
 - B. Amazon EC2
 - C. AWS IAM
 - D. AWS VPC
-

◆ SECTION 7 — SCENARIO QUESTIONS (HIGH VALUE)

◆ Question 18

A company needs to deploy a web server quickly.

Which service should they use?

- A. Amazon S3
- B. AWS IAM
- C. Amazon EC2
- D. AWS CloudWatch

◆ Question 19

A company wants to store backup files securely.

Which service is MOST appropriate?

- A. Amazon EC2
- B. AWS IAM
- C. Amazon S3
- D. AWS Shield

◆ Question 20

A company needs to control who can access resources.

Which service should they use?

- A. Amazon S3
- B. Amazon EC2
- C. AWS IAM
- D. AWS Route 53

◆ ANSWER KEY

- 1. B
- 2. C
- 3. B
- 4. C
- 5. B
- 6. B
- 7. B
- 8. C
- 9. C
- 10. C
- 11. B
- 12. B
- 13. B
- 14. C
- 15. C
- 16. C
- 17. C
- 18. C

19. C
20. C
