

Understood. Let's formalize this into a **high-performance, exam-dominant AWS Cloud Practitioner system**—aligned to how the exam actually behaves, not how engineers typically teach.

What follows is not a generic curriculum. This is a **delivery architecture** you can run immediately with measurable pass-rate improvement.

◆ AWS CLOUD PRACTITIONER — HIGH PASS SYSTEM (REBUILT)

◆ STRUCTURE OVERVIEW

Total Duration: 2 Weeks (Intensive) or 3 Weeks (Balanced)

Model:

- Layer 1 → Foundations (Understand)
 - Layer 2 → Service Recognition (Identify)
 - Layer 3 → Exam Intelligence (Select)
-

◆ PHASE 1 — CORE FOUNDATION (MANDATORY BASE)

■ Session 1: Cloud Fundamentals + AWS Model

Objective:

- Eliminate confusion about “what cloud actually is”

Content:

- Cloud vs On-Prem
- CapEx vs OpEx
- Shared Responsibility Model
- Regions / AZs / Edge

Anchor services:

- Amazon EC2
- Amazon S3
- AWS IAM

■ Session 2: Core Services (High-Weight)

Objective:

- Build confidence in “main AWS pillars”

Content:

- Compute, Storage, Database, Networking basics

Add:

- Amazon RDS
- Amazon VPC

◆ PHASE 2 — SERVICE RECOGNITION LAYER (THIS IS WHERE YOU WERE MISSING)

This phase fixes your previous gap.

■ Session 3: Modern Compute & Serverless

Teach ONLY what matters for exam decisions:

- AWS Lambda
- Amazon ECS
- Amazon EKS
- AWS Fargate
- Amazon API Gateway

Delivery method:

- 1–2 lines per service
- No deep demos

■ Session 4: Infrastructure & Deployment

- AWS CloudFormation
- AWS CDK
- AWS Elastic Beanstalk

Pipeline awareness:

- AWS CodePipeline
 - AWS CodeBuild
-

■ Session 5: Global Architecture (HIGH-YIELD)

- Amazon Route 53
- Amazon CloudFront
- AWS Global Accelerator
- AWS Outposts

Exam pattern:

“Global users → CloudFront”

■ Session 6: AI / ML (Recognition Only)

- Amazon Rekognition
 - Amazon Polly
 - Amazon Transcribe
 - Amazon Translate
 - Amazon Comprehend
 - Amazon SageMaker
-

■ Session 7: Billing, Governance & Enterprise (CRITICAL)

- AWS Organizations
 - AWS Control Tower
 - AWS Budgets
 - AWS Trusted Advisor
 - AWS Pricing Calculator
-

■ Session 8: Migration + Disaster Recovery

Concepts:

- 7Rs strategy
- Backup vs DR
- Pilot Light / Warm Standby

Services:

- AWS Backup
 - AWS DataSync
-

■ Session 9: Architecture Principles

- AWS Well-Architected Framework

Drill all 6 pillars.

◆ PHASE 3 — EXAM INTELLIGENCE LAYER (THIS CHANGES EVERYTHING)

This is where pass rates are made.

■ Session 10: Question Deconstruction

Teach patterns:

Pattern 1: Keywords

- “Global” → CloudFront / Route 53
 - “No servers” → Lambda
 - “Cost control” → Budgets
-

■ Session 11: Elimination Strategy

Train this:

Remove 2 wrong answers immediately.

Example:

- Question about CDN
→ eliminate EC2, RDS → choose CloudFront
-

■ Session 12: Mock Exam + Breakdown

Structure:

- 50 questions timed
 - Review EACH question
 - Explain WHY wrong answers are wrong
-

◆ DELIVERY SYSTEM (HOW YOU PRESENT)

◆ RULE 1: NO OVER-ENGINEERING

Wrong:

- Deep demos
- CLI complexity

Correct:

- Recognition + scenario mapping
-

◆ RULE 2: THE “2-LINE MASTER METHOD”

Every service:

Example:

- Lambda → Run code without servers
 - CloudFormation → Deploy infrastructure using templates
-

◆ **RULE 3: VISUAL GROUPING**

Teach like this:

Compute

- EC2 / Lambda

Global

- Route 53 / CloudFront

Billing

- Budgets / Pricing Calculator
-

◆ **STUDENT MATERIALS (YOU MUST PROVIDE)**

1. One-Page Cheat Sheets

Per category:

- Compute
 - Storage
 - Global
 - Billing
-

2. Practice Engine

- 100–200 questions
 - Daily drills
-

3. Exam Traps Document

Example:

- EC2 vs Lambda confusion
- CloudFront vs S3 confusion
- RDS vs DynamoDB confusion

◆ UPGRADE YOUR POSITIONING

You are not running:

“AWS Training”

You are running:

“AWS Certification Acceleration System (Pass-Oriented)”

◆ FINAL ADJUSTMENT (CRITICAL SHIFT)

Your previous model:

Teach → Practice → Hope they pass

New model:

Teach → Map → Drill → Simulate → Analyze → Pass

If you want the next layer, I can build:

- Slide deck (premium visual structure)
- 100-question exam bank
- 1-page service cheat sheets (ready to send to students)

That’s where this becomes a **repeatable pass machine**, not a mentorship.
